Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. ClaimS 1-3,5-15,22-23,25-26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Capuani (4478378).

Capuani in figure 6 the nozzle and wing arrangement and in col 4 discusses the operation thereof which continues into the top of col. 5 where it states that:

By virtue of the said characteristic the jets emerging from the nozzles 12, apart from being used to induce a supercirculation in that area of the main wing included between the two longitudinal surfaces 5, are also used for providing the secondary wing 10 with a "blown flap" system. Variation in the direction of the jets emerging from the nozzles 12 allows on the one hand control of the lift of the secondary wing 10 and on the other hand does not induce substantial changes in the overall lift. FIG. 6 shows diagrammatically the path of the jets in the aircraft in FIGS. 7 and 8. As illustrated, the jet directed over the main wing 9 is deflected downwards, by the Coanda effect, immediately downstream of this wing so as to produce an increase of lift equal to the magnitude of the thrust of the deflected jet.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 4,16-21,24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Capuani (4478378) in view of Pellissier (1795035).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to pivot the engine of Capuani to deflect the jet as it is an obvious substitute for pivoting and nozzle and further taught by Pellissier.

1. Applicant's arguments filed 8/10/2004 have been fully considered but they are not persuasive. Capuani discloses the on/off lift enhancement action.
2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
